What is Es Viver de plantes de Menorca?

Es Viver is a nursery garden working to promote environmentally friendly, easy to maintain gardens. Very attractive areas can be created by using native plants which require minimum maintenance without the use of chemicals and with only low level watering.

Gardening based on exotic foreign plants causes serious problems including the danger of introducing invasive plants to the Island and the spreading of new garden pests and diseases. Exotic plants need much higher levels of watering, maintenance and cost.

Es Viver de Plantes de Menorca has available a large variety of plants from the Island, whose production is **ecologically approved**, to suit all your requirements. We have native plants for traditional use in the garden and kitchen garden as well as plants for other areas such as the natural purification of sewage and waste water.

What will you find?

- ✿ **Native plants of Minorca** for sustainable and low maintenance gardening.
- ✿ **Aromatic and culinary plants.**
- ✿ **Fruit trees** of local Minorcan varieties.
- ✿ **Seeds and nursery plants** of local varieties.
- ✿ **Traditional Minorcan garden plants** for patios and porches.
- ✿ **Aquatic plants** for purification systems of sewage and waste water (reed bed filtration).
- ✿ **Production of plants** for reforestation.
- ✿ **Soil** for nursery plants and flower pots, ecologically approved.
- ✿ A large range of **ecological pesticides** derived from natural extracts to care for your garden and vegetable garden.
- ✿ **Flower pots and trays of netting** for nursery plants.

What services do we offer?

- ✿ The **design and construction of sustainable gardens** for low cost maintenance.
- ✿ The **maintenance and conservation of gardens and green areas.**
- ✿ The **conversion of conventional gardens** to low maintenance gardens.
- ✿ The construction of **reed beds** for the purification of waste water.
- ✿ **Activities and training courses** on gardens and kitchen gardens.
- ✿ **Environmental regeneration and landscaping** of impoverished areas.
